

# Bridge Scrapers

CEES Ltd are experienced innovators in the design and manufacture of bridge scrapers both rotational and linear.

Our designs incorporate WIMES and other specifications. Value engineering is always at the forefront of CEES Ltd. products. Current innovations incorporate lifting blades, removable centre bearing (from bridge walkway) and swing out end carriage assemblies all result in considerable cost savings and major Health & Safety risk reductions.

Our skilled experienced engineers look at each project individually and make the appropriate design choices, thus ensuring the finished product meets the ultimate expectations.

- Lifting scraper blades allow blade rubbers to be replaced without the need to drain the tank.
