

Control Panel Manufacture & Systems Engineering

CEES Ltd provide Electrical control and system engineering services for a wide range of applications in all sectors.

From small wall mounting through to 4000A MCC's, we provide a fully engineered solution for your control requirements.

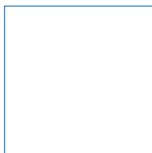

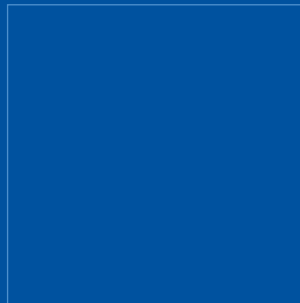

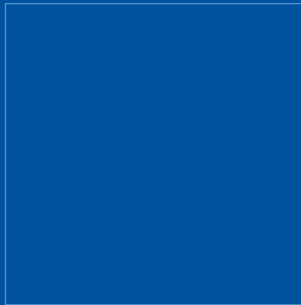

A thorough understanding of required standards such as WIMES, CE, LV, EMC and the Machinery Directive ensure that finished products meet expectations.

Our designers are fully conversant in the latest component innovations thus ensuring a cost effective approach to all your projects.

Using state of the art CAD technology wiring diagrams, layout and parts lists are produced prior to construction for client approval if required.

We can install, test and commission and if required provide operator training as well.

We are approved to ISO9001: 2000 and hold various ASTA and Lloyds certifications.

- Our Trident range of MCC's are ASTA tested and certified.
