

Electrical Engineering & Installation Services

CEES Ltd is an experienced supplier of electrical engineering services to a broad range of industries.

Installations are professionally managed from project conception to completion. Our in-house design office offers complete solutions from cable specification and sizing through to bespoke control and switchgear applications. Our on site teams are trained to high standards in all aspects of Low Voltage cable installation and testing activities. Full supporting certification and documentation is provided as required.

We are an NICEIC approved contractor (power and instrumentation cables) with extensions to our enrolment covering hazardous area operations and we work to BS 7671:2002.

We are confined space trained and our specialist teams only work to approved method statements and risk assessments to ensure Health and Safety compliance throughout.

- All projects professionally managed from conception to completion.
