

Software engineering

Industry demands fast and accurate control of the process together with reliable data acquisition and control.

The hardware and software that provides this functionality constantly changes. CEES Ltd software team ensure they maintain an up to date knowledge of all the latest developments from the major providers of this equipment.

Manufacturers training courses are regularly attended and where applicable competence certification is obtained.

PLC programming both in manufacturers and IEC 61131 format, together with visualisation projects (HMI, PC based and SCADA) are undertaken. At all times we work closely with our client to ensure their needs and expectations are fully met.

● Factory certified engineers.
